

We are POWER

POWER is a 100% employee-owned engineering and environmental consulting firm. We are specialists who team together to create integrated, multidiscipline solutions.

Power Delivery

IOUs. Municipal utilities. Co-ops and REAs. Contractors and developers. We understand your unique challenges. From capital planning, to design, to placing power delivery assets in service, our teams tailor the right solution to meet your needs.

Where foresight meets follow through. Power Engineers is a leading, global consulting, engineering and construction management firm that provides environmentally focused and digitally powered solutions across in the Power & Utilities markets.

Our Services

As an engineering and environmental consulting firm, we diversify our services to strengthen our core competencies in complex, multidiscipline work.

Advanced Distribution Management Systems

We can help you implement advanced applications to achieve faster restoration times, effective asset management, more efficient dispatching of crews during outages and safer environments for your customers and employees.

Electrical Studies

If an electrical power system needs to be modeled, analyzed, calculated, programmed, configured, protected, monitored or studied, we can do it.

Protection and Control

POWER can help you take advantage of the best sensitivity, selectivity and security features of today's protection and control technology.

Transmission and Distribution Engineering

Every project is different. But whatever your grid needs—from complex design to simple upgrades—we can help you make the right decision.

Who We Are

Our name says it all: We're nuts-and-bolts engineers, scientists and consultants who team together to create integrated, multidiscipline solutions.

How We Work

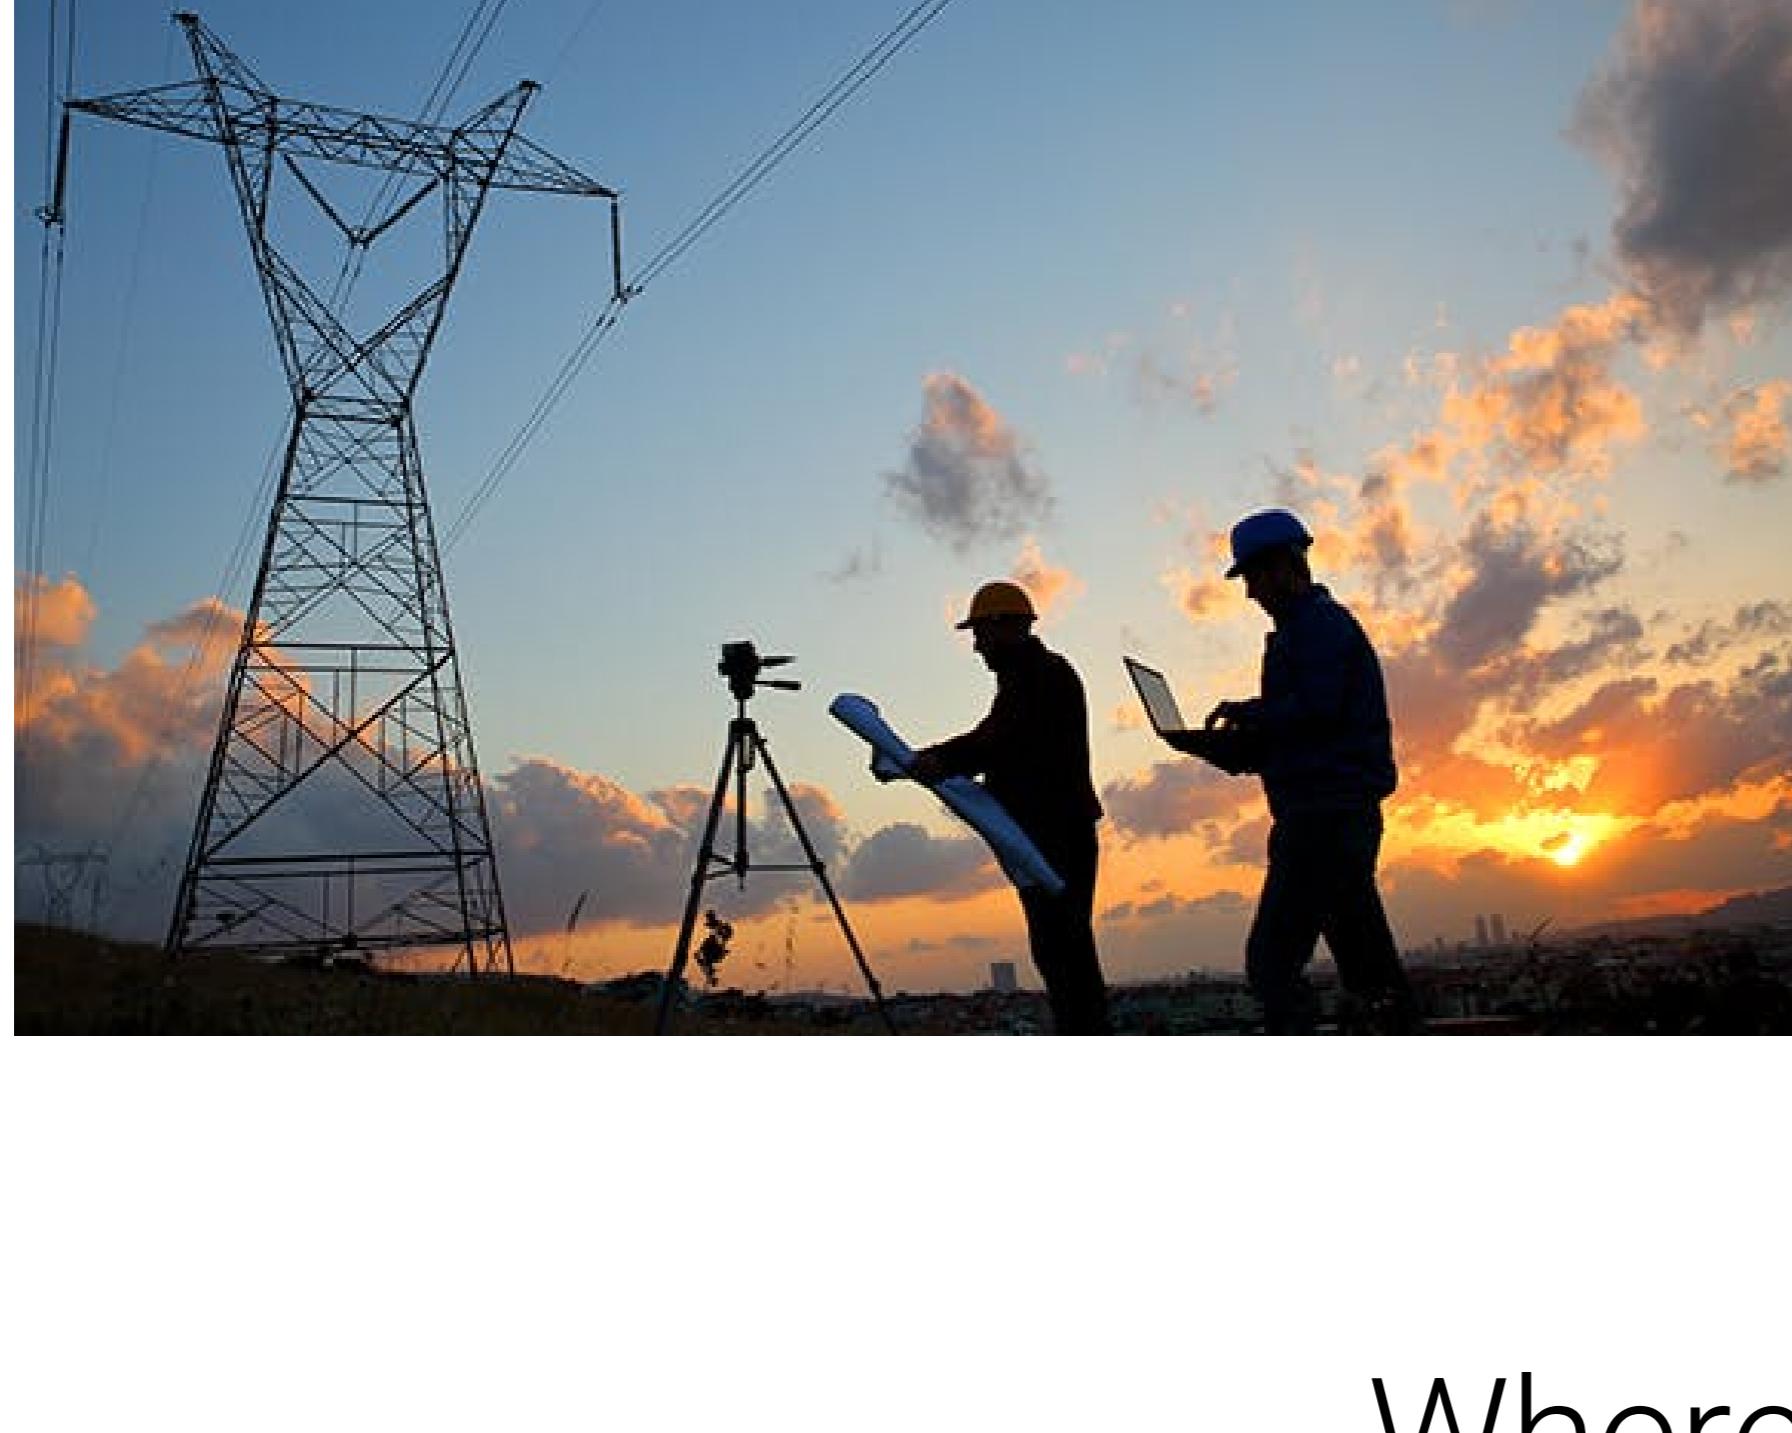

Deeper Bench

We're specialists, not generalists. We combine our core competencies with a culture of multidiscipline teamwork to bring a diversity of knowledge and experience to your project. Here's how we stack up:

- Largest Power Delivery detail designer in the U.S.
- Top 5 in Power (Generation + Power Delivery)
- #2 in Cogeneration

Recognized Experts

Our people are recognized by their contributions to the industries we serve and the engineering and science societies in which we belong. We even host our own technical conferences to share our knowledge with clients and peers. Equally important, we know what it takes to keep our people happy, which means you can count on the same trusted experts again and again.

Experience Easy

We provide a high degree of autonomy to our people, so you can get answers quickly. And we go to great lengths to break down projects and communicate detailed scope, schedule and budget. What happens when changes arise? We're flexible to new conditions and will readily adapt if your project requires it.
